So Many Possibilities...

OK, I know most people don't park their 1967 Pontiac GTO (As promised last time, GTO means - Gran Turismo Omologato) in their basement; but in the movie, FERRIS BUELLER'S DAY OFF, his buddy's Dad parked his Ferrari in the living room so why not?

Think of the possibilities for your design theme.

Really, are you tired of looking at that old grey concrete basement (or any interior concrete) floor?

Don't like the idea of a carpet that is never really clean or a laminate floor that just will not last.

Well, you are ready for a:

ACID STAINED, POLYMERIZED- CEMENT, MICRO FINISH, CONCRETE RESURFACING project from CPD!

Every floor is one of a kind, and custom designed with your help.

Think about a beautiful, unique, acid stained floor in that basement (or any interior concrete surface). Seamless, mold and mildew resistant!

Let us sit down with you and help design a floor that will be the envy of the neighborhood and fit your family's lifestyle. Colors, themes and designs are all personalized to your taste and desire. Call us for a FREE ESTIMATE!
